Education

Charotar University of Science and Technology (CHARUSAT)

2022 – 2026

B.Tech in Computer Science and Engineering | CGPA : 8.86/10

Anand, Gujarat

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Databases: MongoDB, PostgreSQL, SQLite

Frameworks/Libraries: React.js, React Native, Node.js, Express.js, LangChain, Apollo GraphQL, AJV, Selenium, Redux

Cloud/DevOps: AWS S3, AWS Bedrock, Cloudflare R2, Docker, Google Cloud Platform (GCP), Netlify, Render

AI/ML: Agentic AI, Deep Learning, Generative AI, LLMs, LangChain, AI Automation, NLP, Prompt Engineering, RAG

Experience

Digiflux Technologies Private Limited

Dec 2025 – Current

Associate Software Engineer

Vadodara , Gujarat

- Developed and maintained full-stack web and mobile applications using React.js, React Native, Node.js, Express.js, MongoDB, PostgreSQL, and SQLite, delivering scalable, responsive, and user-friendly solutions.
- Built dashboard and enterprise applications (MIXA, DRM Dashboard, Irada Foundation, Poshan Rath) with REST APIs, dynamic data integration, role-based access control, offline synchronization, and performance optimization.
- Designed data engineering and automation solutions, including web scraping for multiple global e-commerce platforms, ETL pipelines, PostgreSQL-to-MongoDB migration, AJV schema validation, and Python automation scripts.
- Applied AI/ML and Generative AI technologies using Python, LangChain, LLMs, Google Gemini, and AWS Bedrock to develop intelligent automation, AI-powered features, image generation, and data processing solutions.
- Integrated cloud and third-party services such as AWS S3, Cloudflare R2, Google Apps Script, Shopify, Odoo, Apollo GraphQL, and Docker, improving asset management, deployment, and business workflows.

Brainybeam Info-Tech Pvt. Ltd.

May 2025 – Aug 2025

Data Science Intern

Ahmedabad, Gujarat

- Built Time-based stock price prediction models for TSLA using Linear Regression with lag features and technical indicators; evaluated performance with MAE, MSE, RMSE, and R^2 .
- Extended to Decision Tree and Random Forest models, applied hyperparameter tuning, and analyzed feature importances for key drivers of stock price movement.

Projects

AI Agent Automation System | *Python, FastAPI, LangGraph, Groq LLM, Telegram Bot API, SQLite*

- Designed and developed an Agentic AI system that converts natural language commands into executable workflows using LangGraph, LLMs, and FastAPI.
- Built a secure automation framework with task planning, Git integration, Python/terminal execution, memory, and automated reporting through a Telegram interface.

Sign Language Detection System | *Python, OpenCV, MediaPipe, Streamlit, TensorFlow*

- Developed a real-time sign language recognition application using computer vision and machine learning for accurate hand gesture detection.
- Implemented MediaPipe landmark tracking and gesture-to-text conversion with live webcam processing to improve communication accessibility.

CareerSense – AI-Powered Career Planning Platform | *Next.js, React, PostgreSQL, Prisma, Groq API, Rapid API*

- Developed a full-stack AI-powered career planning platform with personalized career roadmaps, adaptive career quizzes, resume parsing, job tracking, and AI-driven college recommendations.
- Built secure authentication with NextAuth.js, role-based admin dashboard, interactive career tree visualization using React Flow, and integrated Groq AI and Gemini APIs for intelligent career guidance.

Healthcare Management Systems (Poshan Rath & Swasthya Nagaram) | *React Native, Node.js, SQLite, REST APIs*

- Developed cross-platform healthcare applications with offline-first architecture, patient management, multilingual support, and secure REST API integration.
- Enhanced application reliability through SQLite-based synchronization, caching, pagination, validation, and performance optimization for low-connectivity environments.
